Special Note Regarding Forward-Looking Statements

Safe Harbor Statement under the Private Securities Litigation Reform Act of 1995: This presentation contains, and certain oral statements made by our representatives from time to time may contain, forward-looking statements. Generally, forward-looking statements include information describing actions, events, results, strategies and expectations and are generally identifiable by use of the words "believes," "expects," "intends," "anticipates," "plans," "seeks," "estimates," "projects," "may," "will," "could," "might," or "continues" or similar expressions. The forward-looking statements in this presentation include, without limitation, our 2018 guidance for the Construction and Marine Services segments and statements regarding our expectations regarding building shareholder value and future cash [flow] and invested assets. Such statements are based on the beliefs and assumptions of HC2's management and the management of HC2's subsidiaries and portfolio companies. The Company believes these judgments are reasonable, but you should understand that these statements are not guarantees of performance or results, and the Company's actual results could differ materially from those expressed or implied in the forward-looking statements due to a variety of important factors, both positive and negative, that may be revised or supplemented in subsequent statements and reports filed with the Securities and Exchange Commission ("SEC"), including in our reports on Forms 10-K, 10-Q and 8-K. Such important factors include, without limitation, issues related to the restatement of our financial statements; the fact that we have historically identified material weaknesses in our internal control over financial reporting, and any inability to remediate future material weaknesses; capital market conditions; the ability of HC2's subsidiaries and portfolio companies to generate sufficient net income and cash flows to make upstream cash distributions; volatility in the trading price of HC2 common stock; the ability of HC2 and its subsidiaries and portfolio companies to identify any suitable future acquisition or disposition opportunities; our ability to realize efficiencies, cost savings, income and margin improvements, growth, economies of scale and other anticipated benefits of strategic transactions; difficulties related to the integration of financial reporting of acquired or target businesses; difficulties completing pending and future acquisitions and dispositions; effects of litigation, indemnification claims, and other contingent liabilities; changes in regulations and tax laws; and risks that may affect the performance of the operating subsidiaries and portfolio companies of HC2. Although HC2 believes its expectations and assumptions regarding its future operating performance are reasonable, there can be no assurance that the expectations reflected herein will be achieved. These risks and other important factors discussed under the caption "Risk Factors" in our most recent Annual Report on Form 10-K filed with the SEC, and our other reports filed with the SEC could cause actual results to differ materially from those indicated by the forward-looking statements made in this presentation.

You should not place undue reliance on forward-looking statements. All forward-looking statements attributable to HC2 or persons acting on its behalf are expressly qualified in their entirety by the foregoing cautionary statements. All such statements speak only as of the date made, and unless legally required, HC2 undertakes no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise.

Non-GAAP Financial Measures
In this presentation, HC2 refers to certain financial measures that are not presented in accordance with U.S. generally accepted accounting principles ("GAAP"), including Core Operating Subsidiary Adjusted EBITDA, Total Adjusted EBITDA (excluding the Insurance segment), Adjusted EBITDA for its operating segments, Adjusted Operating Income for the Insurance segment and Pre-Tax Adjusted Operating Income for the Insurance segment.

Adjusted EBITDA
Management believes that Adjusted EBITDA measures provide investors with meaningful information for gaining an understanding of the Company's results as it is frequently used by the financial community to provide insight into an organization's operating trends and facilitates comparisons between peer companies, because interest, taxes, depreciation, amortization and the other items for which adjustments are made as noted in the definition of Adjusted EBITDA below can differ greatly between organizations as a result of differing capital structures and tax strategies. In addition, management uses Adjusted EBITDA measures in evaluating certain of the Company's segments performance because they eliminate the effects of considerable amounts of non-cash depreciation and amortization and items not within the control of the Company's operations managers. While management believes that these non-GAAP measurements are useful as supplemental information, such adjusted results are not intended to replace our GAAP financial results and should be read together with HC2's results reported under GAAP.

Management defines Adjusted EBITDA as Net income (loss) as adjusted for depreciation and amortization; amortization of equity method fair value adjustments at acquisition; (gain) loss on sale or disposal of assets; lease termination costs; asset impairment expense; interest expense; net gain (loss) on contingent consideration; loss on early extinguishment or restructuring of debt; gain (loss) on sale of subsidiaries; other (income) expense, net; foreign currency transaction (gain) loss included in cost of revenue; income tax (benefit) expense; (gain) loss from discontinued operations; noncontrolling interest; bonus to be settled in equity; share-based compensation expense; non-recurring items; and acquisition and disposition costs. A reconciliation of Adjusted EBITDA to Net Income (Loss) is included in the financial tables at the end of this presentation. Management recognizes that using Adjusted EBITDA as a performance measure has inherent limitations as an analytical tool as compared to net income (loss) or other GAAP financial measures, as these non-GAAP measures exclude certain items, including items that are recurring in nature, which may be meaningful to investors. As a result of the exclusions, Adjusted EBITDA should not be considered in isolation and do not purport to be alternatives to net income (loss) or other GAAP financial measures or a measure of our operating performance. Total Adjusted EBITDA excludes the results of operations and any consolidating eliminations of our Insurance segment.

Adjusted Operating Income
Adjusted Operating Income ("Insurance AOI") and Pre-tax Adjusted Operating Income ("Pre-tax Insurance AOI") for the Insurance segment are non- GAAP financial measures frequently used throughout the insurance industry and are economic measures the Insurance segment uses to evaluate its financial performance. Management believes that Insurance AOI and Pretax Insurance AOI measures provide investors with meaningful information for gaining an understanding of certain results and provide insight into an organization's operating trends and facilitates comparisons between peer companies. However, Insurance AOI and Pre-tax Insurance AOI have certain limitations, and we may not calculate it the same as other companies in our industry. It should, therefore, be read together with the Company's results calculated in accordance with GAAP. Similarly to Adjusted EBITDA, using Insurance AOI and Pre-tax Insurance AOI as performance measures have inherent limitations as an analytical tool as compared to income (loss) from operations or other GAAP financial measures, as these non-GAAP measures exclude certain items, including items that are recurring in nature, which may be meaningful to investors. As a result of the exclusions, Insurance AOI and Pre-tax Insurance AOI should not be considered in isolation and do not purport to be an alternative to income (loss) from operations or other GAAP financial measures as measures of our operating performance.

Management defines Insurance AOI as Net income (loss) for the Insurance segment adjusted to exclude the impact of net investment gains (losses), including OTTI losses recognized in operations; asset impairment; intercompany elimination; gain on bargain purchase; reinsurance gain; and acquisition costs. Management defines Pre-tax Insurance AOI as Insurance AOI adjusted to exclude the impact of income tax (benefit) expense recognized during the current period. Management believes that Insurance AOI and Pre-tax Insurance AOI provide meaningful financial metrics that help investors understand certain results and profitability. While these adjustments are an integral part of the overall performance of the Insurance segment, market conditions impacting these items can overshadow the underlying performance of the business. Accordingly, we believe using a measure which excludes their impact is effective in analyzing the trends of our operations.

By accepting this document, each recipient agrees to and acknowledges the foregoing terms and conditions.
